## Abstract

This is some abstract.

Paper title

## **1 Introduction**

A captivating introduction is all you need.

### **1.1 The power of knowing**

Followed by a good description of previous studies (Collins et al., 2001).

## **2 Imputation methods and algorithms**

A selection of methods

### **2.1 Method 1**

Very cool method 1.

### **2.2 Method 2**

Very cool method 2.

**2.2.1 Aspect 1.** Aspect 1

**2.2.2 Aspect 2.** Aspect 2

## **3 Simulation study 1**

Why we did what we did.

### **3.1 Simulation study procedure**

**3.1.1 Data generation.** How we generated data

**3.1.2 Missing data imposition.** How we imposed missing data

**3.1.3 Imputation.** Imputation models specification

**3.1.4 Analysis and comparison criteria.** Outcome measures

### **3.2 Results**

What results did we report

**3.2.1 Aspect 1.** Here is a picture of what happened

**3.2.2 Aspect 2.** This is something else we found.

## **4 Limitations and future directions**

This is what's left to be done.

## **5 Discussion**

### **5.1 Methods that work well**

Discuss it.

### **5.2 Methods with mixed results**

And discuss it.

## **6 Availability of data and materials**

The data that support the findings of this study are available at [\[https://some-url\]](https://some-url).

## **7 Code availability**

The code used for the study is available at the corresponding author's GitHub page: [\[https://github.com/EdoardoCostantini/some-url\]](https://github.com/EdoardoCostantini/some-url). Please read the README.md files for instructions on how to replicate the results.
