## Abstract

This is some abstract.

#### Paper title

# 1 Introduction

A strong and commanding introduction.

### 3 1.1 The power of knowing

Followed by a good description of previous studies (Collins, Schafer, & Kam, 2001).

#### 2 Imputation methods and algorithms

A selection of methods

#### $_{ m 8}$ 2.1 Method 1

6

14

Very cool method 1.

#### 10 2.2 Method 2

- Very cool method 2.
- 2.2.1 **Aspect 1.** Aspect 1
- 2.2.2 **Aspect 2.** Aspect 2

### 3 Simulation study 1

Why we did what we did.

#### 16 3.1 Simulation study procedure

- 3.1.1 Data generation. How we generated data
- 3.1.2 Missing data imposition. How we imposed missing data
- 3.1.3 Imputation. Imputation models specification
- 3.1.4 Analysis and comparison criteria. Outcome measures

#### 21 3.2 Results

22 What results did we report

# 3.2.1 Aspect 1. Here is a picture of what happened

# density.default(x = x)

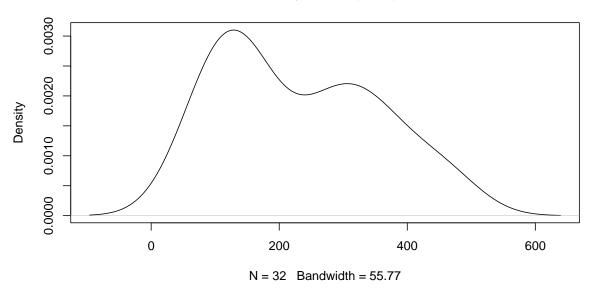

Figure 1. Some caption

**3.2.2** Aspect 2. This is something else we found.

4 Limitations and future directions

This is what's left to be done.

5 Discussion

5.1 Methods that work well

Discuss it.

25

26

27

29

5.2 Methods with mixed results

And discuss it.
