Abstract

This is some abstract.

Paper title

1 Introduction

A ~~strong and commanding introduction~~ captivating introduction is all you need.

1.1 The power of knowing

Followed by a good description of previous studies (Collins, Schafer, & Kam, 2001).

2 Imputation methods and algorithms

A selection of methods

2.1 Method 1

Very cool method 1.

2.2 Method 2

Very cool method 2.

2.2.1 Aspect 1. Aspect 1

2.2.2 Aspect 2. Aspect 2

3 Simulation study 1

Why we did what we did.

3.1 Simulation study procedure

3.1.1 Data generation. How we generated data

3.1.2 Missing data imposition. How we imposed missing data

3.1.3 Imputation. Imputation models specification

3.1.4 Analysis and comparison criteria. Outcome measures

3.2 Results

What results did we report
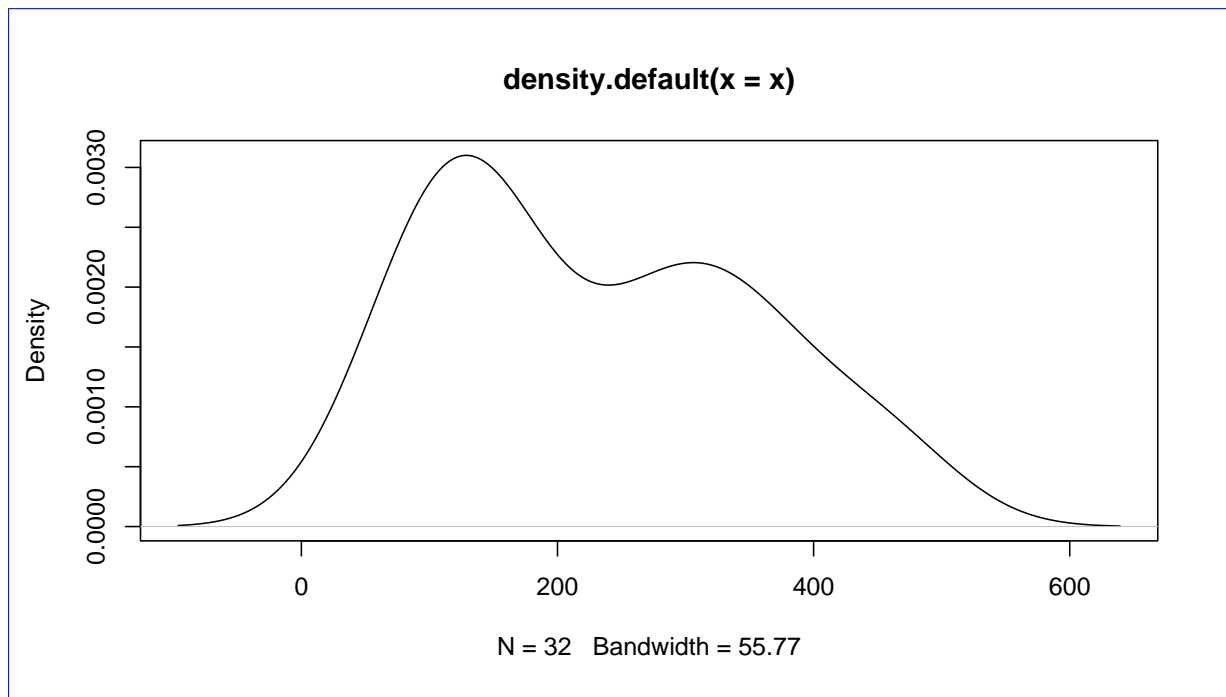

3.2.1   Aspect 1.   Here is a picture of what happened

Figure 1.   Some caption

3.2.2   Aspect 2.   This is ~~what we find~~

~~md.patterns plot~~

4   ~~Simulation study 2~~

~~Why we did what we did.~~

3.1   ~~Simulation study procedure~~

3.0.1   ~~Data generation.~~   ~~How we generated data~~

3.0.1   ~~Missing data imposition.~~   ~~How we imposed missing data~~

3.0.1   ~~Imputation.~~   ~~Imputation models specification~~

3.0.1   ~~Analysis and comparison criteria.~~   ~~Outcome measures~~

3.1   ~~Results~~

~~What results did we report~~

3.0.1   ~~Aspect 1.~~   ~~Here is a picture of what happened~~

3.0.1 ~~Aspect 2.~~ ~~This is what we find~~ something else we found.

4 Limitations and future directions

This is what's left to be done.

5 Discussion

5.1 Methods that work well

Discuss it.

5.2 Methods with mixed results

And discuss it.
